🎯 Objective

Web Developer seeking to create exceptional digital experiences that captivate and delight users by leveraging technical proficiency, creativity, and problem-solving skills. Committed to continuous learning and keeping up-to-date with emerging trends and best practices. Goal is to develop robust and scalable web applications that integrate with the latest technologies and exceed expectations to drive business success

📋 Summary

Experienced Software Developer with **3.6+ years** of expertise in **Web Development** technologies, including **React JS, Redux**, **ES6, PHP, JavaScript, SQL, REST API, jQuery, AJAX, HTML5**, and **CSS3**

- Experienced in system analysis, workflow design and full-cycle development and maintenance of web applications
- Designed and developed interactive web apps with **React JS, JavaScript, jQuery, HTML5, AJAX**, and **CSS3**
- Proficient in developing **RESTful API** with **PHP** and **SQL** to seamlessly integrate web apps with **MySQL** database, enabling dynamic data loading
- Extensive knowledge of web technologies and standards, including **responsive Web UI**, to ensure optimal user experience across web and mobile devices
- Experienced in designing and developing **Single Page Applications** (SPA)
- Strong understanding of manual testing for web-based applications across various device platforms
- Expertise in **Responsive** and **Interactive Web Design**, including cross-browser/device compatibility and a range of effects from transitions to parallax scrolling
- Extensive experience in **Agile** web app development with proficiency in **Git** and **JIRA**

👤 Professional Experience

Collabera Digital   Pune, India
Frontend Developer   Nov 2022 – March 2023

- Collaborated with team to assess Admin Dashboard architecture and propose improvements
- Gathered, analyzed, and documented **business requirements**, **functional requirements**, and **data specifications** for application development
- Designed and developed the Template Module in the **Admin Dashboard** by utilizing **React JS, HTML5, CSS, JavaScript** and **REST API Integration**
- Improved and optimized User Profile Module in Admin Dashboard
- Created MySQL database tables according to the specified database schema

HCL Technologies.   Bangalore, India
UI/UX Developer   April 2022 – June 2022

- Analyzed Client's Commercial Website architecture to understand functionalities and limitations
- Designed and developed user-friendly Commercial Website UI with **React JS, HTML5, CSS, JavaScript** and **API integration**

Altezzasys System Pvt. Ltd.   Pune, India
Web developer   May 2021 – March 2022

- Collaborated with the team to discuss the MVC architecture of CRM modules and application flow
- Designed and developed web UI using **HTML5, CSS, JavaScript, jQuery**

- Developed **PHP** script to fetch data from database using **SQL** and **RESTful APIs** and represented data with web UI
- Optimized existing code that **Improved performance** and **response time** of module by **60%**
- Developed bug fixes and enhancements to improve code quality and functionality, to be included in future releases
- Developed comprehensive **unit test** cases to evaluate and verify the functional and business logic of the code
- Collaborated with the QA team to conduct **performance testing** successfully
- Participated in daily **scrum meetings** to discuss development requirements and challenges of **sprint tasks** with the team and track progress in **JIRA**

PDV Technocrats   Pune, India
Web developer   June 2020 – April 2021

Pharmacy Management (Administrative Application & Pharmacy App) and E-commerce (Sanvi Food App)
- **Strategized** and **designed** UI to enhance user experience according to customer requirements
- Developed **interactive web-based admin dashboard** leveraging **JavaScript**, **jQuery**, **Ajax**, **Bootstrap**, **CSS3**, and **HTML5**
- **Optimized SQL query response time** by analyzing database requirements, aligning them with the application architecture, and designing an **efficient database schema**
- Improved application's **performance** and **response time** by implementing Routing
- Utilized **Firebug** and **web developer tools** on Chrome, Firefox, and Internet Explorer to effectively debug applications and resolve technical issues
- Developed **REST APIs** in **PHP** and **SQL** to seamlessly integrate data with the frontend UI
- Conducted thorough testing of **RESTful APIs** using **Postman** by passing various parameters, validating expected responses, and ensuring their proper functioning
- Deployed web application on **Go daddy web server**

Purplechai Technology   Pune, India
Web developer   Aug 2018 – July 2019

- Developed **dynamic** and **interactive** website using **JavaScript**, **HTML5**, **CSS,** and **Bootstrap**
- Developed **bug fixes** and patches to address open issues that did not align with customer requirements
- Facilitated user acceptance testing and gathered customer feedback by presenting the final developed application
- Provided support to address customer queries and issues related to web application behavior and performance
